DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. L. James Ristas on 25 May 2006.

The application has been amended as follows:

Claim 14 (Canceled).

3. The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed. Claim 1 is the independent claim.

Independent claim 1 sets forth a book pressing machine, wherein the improvement comprises that the conveyor belt operates in a transport direction that cyclically conveys the book into and out of the pressing position with the spine leading in which the front of the pressing table forms a sharp edge for

deflecting the conveyor belt away from the transport direction; and a pressing rail separate from the pressing plate forms a front end-piece for the pressing plate and is operatively associated with the pressing plate to provide vertical movement for holding down the book cover as the pressing plate is opened and reciprocating horizontal movement for accelerating the book as the book is conveyed out of the pressing position.

The closest prior art of record is to Voss (DE 197 48 832 A 1). Voss discloses a book forming and press machine comprising a first station 2 having rotably driven press rollers 5/6 for rolling on the side surfaces of a book 1. In the conveyor direction of the book a second station 3 comprises fold-forming (pressing) rails 10/11. Alignment devices 12-19 and conveyor components 4-6/8/23/24 move the book forward stepwise through the forming and pressing machine. At least one of the transport rollers is so driven that the book is provided with an accelerated movement. Voss does not disclose that the front of the pressing table forms a sharp edge for deflecting the conveyor belt away from the transport direction, or that the pressing rail forms a front end-piece for the pressing plate (rollers) and is operatively associated with the pressing plate (rollers) to provide vertical movement for holding down the book cover as the pressing plate (rollers) is opened and reciprocating horizontal movement for accelerating the book as the book is conveyed out of the pressing position.

There is no combinable teaching in the prior art of record that would reasonably motivate one having ordinary skill in the art to so modify the

Art Unit: 3722

teachings of Voss, and thus, for at least the foregoing reasoning, the prior art of record does not render obvious the present invention as set forth in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric A. Gates whose telephone number is 571-272-5498. The examiner can normally be reached on Monday-Thursday 7:45-6:15.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Monica Carter can be reached on 571-272-4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
